The suggestive instructions:

1. This electric massage bed uses a three-wire power cable. Meanwhile it should be inserted into the three-hole outlet where there is a ground electrode. It should be assured that it be connected to the ground electrode smoothly so that it can prevent people from getting electric shock while functioning normally.
2. All the plugs, buttons and other components connected to the power cable must not dip in the water or other liquid.
3. It is forbidden to put your hands, feet, head or other part of the body into the gap while massage chair is running when you press the control panel or the foot control panel.
4. It is prohibited to use when plug, buttons and other components connected to the power cable are broken.
5. It should be noticed that the frequency is 6min/h when the motor of this massage chair is used.
6. The maintenances should be performed by knowledgeable professionals.
